

IOT CLUB

ABOUT THE CLUB

The IoT club serves as a place of community for students to discuss, learn about, and working on projects related to IoT. Members of the IoT club are offered with a range of programs and activities such as seminars, workshops, short courses, certifications, hackathons and project competitions. The club is supported by both internal and external experts who assist the students in strategizing and organizing activities that will help them knowledge and skills in IoT. The clubs aims to guide students and prepare them to pursue their professional careers in industries specializing in IoT.

OBJECTIVE OF THE CLUB

- To enhance the technical skills in IOT domain
- Make aware about modern IOT tools and methodologies
- Acquire knowledge in current IOT research domain and IOT application
- Impact professional practice relevant to technical education
- Channelize development with respect to academic qualifications and imbibe training to develop the project prototype
